Book Review

Fascinating world of truckies and their shiny machines

Hot on the heels of international best seller, *The Drover*, Alice

Mabin has confirmed her fascinating second large-scale book will be released on July 1.

The *Driver*, Australia and New Zealand on the Back of a Truck, unveils the most in-depth on-the-road trucking research ever seen in Australia and New Zealand.

In 228 pages, *The Driver*, self published by Alice, documents the reality of the daily grind for 110 different trucking companies and drivers with stunning images featuring every state and territory in Australia and New Zealand.

The book is a real life tale of the captivating lives of truck drivers.

A total of 19,600 professional photographs have been tirelessly condensed into just 700 pictures that finally made the grade to enter the finished product.

The Drover was a runaway instant success, selling out its first print run of 1,000 copies in just one week.

It tells the story of the biggest cattle transaction in Australia in 100 years, *The Brinkworth Drove*, which made global news.

Limited copies of *The Drover* are still available from the *Riverine Grazier* Bookshop and copies of *The Driver* are expected to be available early next month.
